

**FOR IMMEDIATE RELEASE**

## Comarch Poland and Raz-Lee Security partner for IBM i Auditing Solutions

*Leading European hosting company purchases suite of iSecurity solutions to provide best-of-breed IBM i audit solutions to large multi-national insurance company*

**Nanuet, NY** (April 2, 2013) – Raz-Lee Security, a leading provider of IBM i security, auditing and compliance solutions, today announced that it has sold a number of iSecurity solutions to Comarch, headquartered in Krakow, Poland. The products are part of an overall security monitoring and auditing solution which Comarch has implemented for the Network and Security Operation Center to monitor the hosted i5/OS platform for its insurance customers.

The use of Raz-Lee Security products directly on the customer's environment will provide added value in the form of auditing, security and compliance-related reports, as well as the ability to quickly analyze network events and system journal activities using Raz-Lee's advanced business-intelligence product, Visualizer.

Eli Spitz, VP of Business Development at Raz-Lee Security said: "Raz-Lee is proud to supply Comarch, one of the leading hosting companies in Europe, with state-of-the-art IBM i technologies for security, auditing and compliance at a major European financial institution. We see this activity as the gateway to further business with Comarch in the future."

"We are pleased to have Raz-Lee Security as a business partner," said Adam Tymofiejewicz, Consulting Director for Comarch IT Global Services at Comarch Luxembourg. Mr. Tymofiejewicz added that "The functionality and scalability of the Raz-Lee Security product suite gives us the possibility to provide our clients with comprehensive security monitoring services. Our partnership with Raz-Lee Security enables our hosted IBM i clients to leverage the benefits of their iSecurity suite of security, auditing and compliance solutions with Comarch's experience in IT outsourcing services.

### **About Comarch**

Comarch is a leading Central European IT solutions provider specializing in the design, implementation and integration of advanced IT systems and infrastructure, as well as technology-based business solutions. The company distinguishes itself through its comprehensive range of solutions for businesses in all vertical sectors: Telecommunications, Financial Services, Industries, Large Enterprises, Public Administration and Service Sector. The company offering includes outsourcing and consulting services, ERP systems, IT security, business intelligence, CRM and sales support systems. Comarch has a multinational network of offices employing over 3500 highly-experienced IT specialists in Europe, the Middle East and the Americas.

### **About Raz-Lee Security Inc. and iSecurity**

Raz-Lee Security is a leading international provider of security, auditing and compliance (SOX, PCI, HIPAA, etc.) solutions for the IBM i. Raz-Lee's customers include companies of all sizes, from SMBs to enterprises with hundreds of systems, in all vertical markets and industries. Financial institutions such as banks and insurance companies are especially well represented amongst Raz-Lee's clientele.

The iSecurity suite of products includes both **infrastructure security solutions** which protect network access, monitor and report on system activities, manage user profiles and authorities, track software changes, etc., and **application security solutions** which audit database activity, provide real-time alerts when critical business data changes, enable Business Intelligence analysis of application data changes and much more. iSecurity has full multi-LPAR management capabilities and works in both green-screen full GUI modes.
