About Raz-Lee Security

Founded in 1983, Raz-Lee Security is one of the world's leading independent owned cybersecurity and compliance solution providers for IBM i servers (AS/400).

Raz-Lee's flagship iSecurity suite guards organizations against insider threats and unauthorized external access to business-critical information hosted on their IBM i. We have developed cutting-edge solutions that have revolutionized analysis and fortification of IBM i servers.

We build solutions that work with other companies' technologies allowing organizations to monitor IBM i activity via SIEM or DAM dashboards.

Technology Business Partners

About iSecurity Suite

Advanced Threat Protection

- **Anti-Ransomware**
- **Antivirus** / Malware protection
  - **ICAP** Optional Client/Server for Antivirus

Authentication & Authorization

- **MFA** Multi Factor Authentication
- Self **Password Reset**
- **Authority On Demand**

Protection

- **Firewall** FTP, ODBC...access
- Monitor CL **Commands**
- **Safe-Update** to protect production files

Evaluation, Reporting & Alerts

SIEM & DAM Support

Syslog, SNMP, CEF, LEEF

Visualizer

Business Intelligence for Security

Score Cards

for GDPR, SOX, PCI, HIPAA...

Security Investigator

Data Discovery, Authority Inspector, Assessment

Encryption

- DB2 **Field Encryption** (FIELDPROC)
- **PGP File Encryption**

Data Base Solutions

- **AP-Journal** DB Audit, Filter, Alerts, SIEM
- **DB-Gate** Native SQL to Oracle, MSSQL...
- **FileScope** Secured file editor

Auditing & Response

- **Audit** Journal, System Values, Status...
- Proactive re-**Action** in real time
- **Capture** screen activity
- **Compliance** of Users, Objects, IFS
- **Change Tracker** watch Production Libraries

Assessment

Advanced Security Scan

How effective your IBM i security is?

Unfortunately many companies don't and hope that the security "hot potato" will not become an issue.

- As such, and because they believe that IBM i is a secure operating system, these companies downplay the need for a comprehensive security solution for the System i.

- In reality, every system MUST be checked regularly for compliance levels, in order to ensure the highest levels of security and auditing possible.

RAZ-LEE
iSecurity

In-depth analysis

Assessment is a Windows-based program for in-depth analysis of the full scope of the IBM i server (AS/400) security strengths and weaknesses, pinpointing the security risks which should be addressed.

- The output is a detailed report, grading each facet of IBM i security, with full explanations.

- The iSecurity Assessment checks your systems' security-related definitions and values and reports – in minutes – the exact strengths and weaknesses of your computer's security policies.

RAZ-LEE
iSecurity

Assessment Report

The Assessment Report shows:

- If the network is really protected

- If ports are wide open to intruders

- If user sign-on attributes are implemented properly

- If there are too many power users accessing the network

- If auditing policies are performing as necessary

- How secure the network would be by using iSecurity

- If security policies adhere to IBM's recommended values

- What is the common denominator for object authorities?

- If the network is detecting security breaches in real-time

- If there is a minimum number of power users defined

- If the system is PCI, SOX, etc. compliant

Assessment Guarantee

Assessment is certified by Raz-Lee Security and outside experts for validity, precision, and accurate results.

- Performs a thorough check on the efficiency of your System I

- Hyperlinks help navigate through different sections

- Provides colorful, graphically-displayed results

- Provides a detailed written analysis of security policy efficiency

- Numerical scores help explain results

- Covers user class, user privileges, system settings, exit points, sign-on attributes, password control, network protection, unattended terminals, and more.

RAZ-LEE
iSecurity

iSecurity Assessment Advantages

- Easy-to-use: simply download, execute and obtain results in minutes

- Intuitive and easy-to-understand

- Industry best-practice security system value recommendations

- Raz-Lee certified for accuracy

- Suggests iSecurity products required for maximum security and compliance

- Thorough and comprehensive – checks ALL aspects of your system security
