## FILESCOPE

Efficient and secure File Editor

# About Raz-Lee Security

---

Founded in 1983, Raz-Lee Security is one of the world's leading independent owned cybersecurity and compliance solution providers for IBM i servers (AS/400).

Raz-Lee's flagship iSecurity suite guards organizations against insider threats and unauthorized external access to business-critical information hosted on their IBM i. We have developed cutting-edge solutions that have revolutionized analysis and fortification of IBM i servers.

We build solutions that work with other companies' technologies allowing organizations to monitor IBM i activity via SIEM or DAM dashboards.

## Technology Business Partners

---

# About iSecurity Suite

## Advanced Threat Protection

- Anti-Ransomware
- Antivirus / Malware protection
  - ICAP Optional Client/Server for Antivirus

## Authentication & Authorization

- MFA Multi Factor Authentication
- Self Password Reset
- Authority On Demand

## Protection

- Firewall FTP, ODBC...access
- Monitor CL Commands
- Safe-Update to protect production files

## Evaluation, Reporting & Alerts

### SIEM & DAM Support

Syslog, SNMP, CEF, LEEF

### Visualizer

Business Intelligence for Security

### Score Cards

for GDPR, SOX, PCI, HIPAA...

### Security Investigator

Data Discovery, Authority Inspector, Assessment

## Encryption

- DB2 Field Encryption (FIELDPROC)
- PGP File Encryption

## Data Base Solutions

- AP-Journal DB Audit, Filter, Alerts, SIEM
- DB-Gate Native SQL to Oracle, MSSQL...
- FileScope Secured file editor

## Auditing & Response

- Audit Journal, System Values, Status...
- Proactive re-Action in real time
- Capture screen activity
- Compliance of Users, Objects, IFS
- Change Tracker watch Production Libraries

# FileScope

Efficient and secure File Editor

# Edit Files at IBM i

---

Information retrieval and manipulation methods such as DFU or QUERY, require compilation and definition steps.

- The primary focus of FileScope is to enhance general user productivity and at the same time provide super-user level tools to those who can benefit from them: System Administrators and DBAs.
- Unlike SQL, iSecurity FileScope enables modifying database requests on the fly, performs record updates under your visual control, holds complete control over printing of reports and supports UNDO for any change!

# iSecurity FileScope

---

FileScope's powerful capabilities have enabled thousands of iSeries users world-wide to quickly and easily perform file editing functions as well as advanced activities such as global and local record updates, data conversion and creation of test data.

## Our Solution:

- Software development and maintenance times are greatly reduced
- Advanced error tracing and identification capabilities
- Print, e-mail or export a complete audit trail
- Undo any set of changes, or particular change, performed during the last 99 days

# Easy-to-manipulate

---

FileScope has a simple, easy-to-manipulate user interface and does away with the need to program even a single line of code!

## How iSecurity FileScope Enhances Programmer Productivity?

- Triggers alert messages and corrective actions
- High speed report generator, with no prior preparation
- Subset Feature, enables field names when defining subsets
- Query Wizard, quickly creates queries without programming

# iSecurity FileScope Advantages

---

- FileScope includes Unicode support which enables viewing SAP, JDE, MOVEX, BPCS, and othes
- Improved SOX/PCI support
- SYSLOG/SNMP Messages for SIEM – transmits up to 1000 lines per second.
- User Activity List Email – including users, times and actions.
- XML support
- Report Generator
- Full Screen Update
