iSecurity
Assessment

iSecurity Assessment

| Advanced Security | Scan

Every system **MUST** be checked regularly for compliance levels, in order to ensure the highest levels of security and auditing possible.

How effective your IBM i security is?

Unfortunately, many companies don't and hope that the security "hot potato" will not become an issue.

As such, and because they believe that IBM i is a secure operating system, these companies downplay the need for a comprehensive security solution for the System i.

In reality, every system **MUST** be checked regularly for compliance levels, in order to ensure the highest levels of security and auditing possible.

Assessment Report

The Assessment Report shows:

- ✓ If the network is really protected.
- ✓ If ports are wide open to intruders.
- ✓ If user sign-on attributes are implemented properly.
- ✓ If there are too many power users accessing the network.
- ✓ If auditing policies are performing as necessary.
- ✓ How secure the network would be by using iSecurity.
- ✓ If security policies adhere to IBM's recommended values.
- ✓ What is the common denominator for object authorities?
- ✓ If the network is detecting security breaches in real-time.
- ✓ If there is a minimum number of power users defined.
- ✓ If the system is PCI, SOX, etc. compliant.

iSecurity Assessment Insights

The **iSecurity Assessment** checks your systems' security-related definitions and values and reports – in minutes – the exact strengths and weaknesses of your computer's security policies.

Our Solution:

- ✓ Detailed report.
- ✓ Grading each facet of IBM i security.
- ✓ Full explanations.

Assessment

Let's see our Product in Action!

The best way to see how it works is a demo with
iSecurity Assessment running on a real environment.

RAZ-LEE

Security Scores

Security Scores and Recommendations Summary

Section	Score	Explanation
❌ 3.1 Sign-on Attributes	32	The computer's settings are invalid and pose immediate security threats.iSecurity User Sign On functionality should be implemented.
❌ 3.2 Use of Adopted Authority	0	Only the actual usage of adopted programs can be analyzed.iSecurity Firewall can locate all programs using Adopted Authority and also allows for approving/disapproving Adopted Authority for such programs.
❌ 3.3 Unattended terminals	0	Computer settings are faulty.Avoid a possible security threat to the network by implementing iSecurity Screen.
⚠️ 3.4 Miscellaneous Sign-on	66	Some miscellaneous sign-on values are in accordance with industry standards. However, the computer's scores are borderline and should be reviewed.
❌ 3.5 Password Control	13	Computer settings are faulty and open to password-related security threats.iSecurity Password should be implemented.
❌ 3.6 Activation of Network Protection	15	The computer is not protected and therefore may have a severe security threat.
✅ 3.7 Auditing System and User Activities	83	Most of the computer's auditing policies are in place and require only minimal revisions.iSecurity Audit should be implemented.
⚠️ 3.8 Users Class	50	This number is too high for proper security; review security policies and reduce the number of power users.iSecurity Audit should be implemented.

IBM i Security Assessment and Advisory Report

Distribution Of Users

| Advantages on our Solution

iSecurity Assessment is certified by Raz-Lee Security and outside experts for validity, precision, and accurate results.

Assessment Guarantee

- ✓ Performs a thorough check on the efficiency of your System i.
- ✓ Hyperlinks help navigate through different sections.
- ✓ Provides colorful, graphically-displayed results.
- ✓ Provides a detailed written analysis of security policy efficiency.
- ✓ Numerical scores help explain results.
- ✓ Covers user class, user privileges, system settings, exit points, sign-on attributes, password control, network protection, unattended terminals, and more.

iSecurity Assessment Advantages

- ✓ Easy-to-use: simply download, execute and obtain results in minutes.
- ✓ Intuitive and easy-to-understand.
- ✓ Industry best-practice security system value recommendations.
- ✓ Raz-Lee certified for accuracy.
- ✓ Suggests **iSecurity** products required for maximum security and compliance.
- ✓ Thorough and comprehensive – checks ALL aspects of your system security.
