iSecurity
FileScope

Enhances Programmer's Productivity

iSecurity FileScope has a simple, easy-to-manipulate user interface and does away with the need to program even a single line of code.

RAZ-LEE

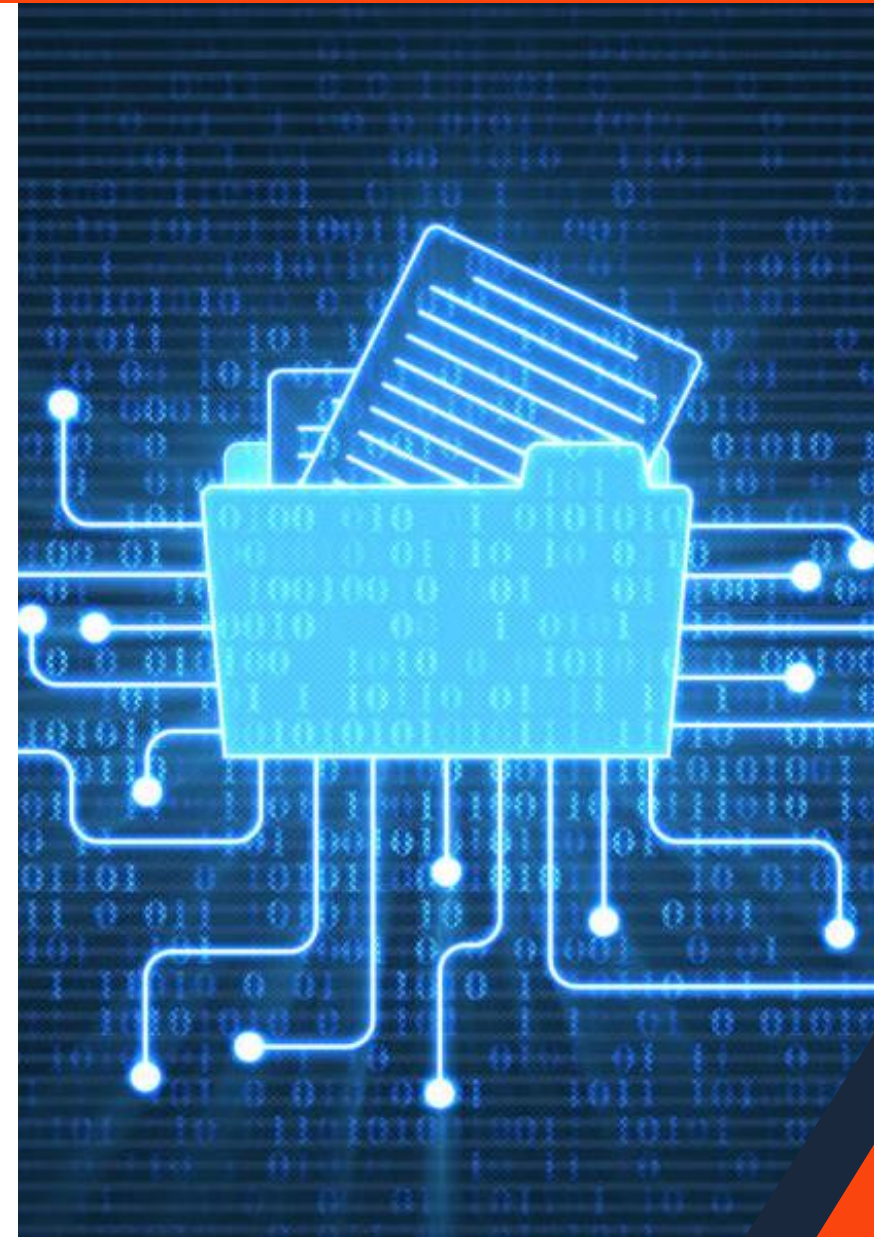

Edit Files at IBM i

Information retrieval and manipulation methods such as **DFU** or **QUERY**, require compilation and definition steps.

- ✓ The primary focus of **FileScope** is to enhance general user productivity and at the same time provide super-user level tools to those who can benefit from them:

System Administrators and DBAs.

- ✓ Unlike SQL, **iSecurity FileScope** enables modifying database requests on the fly, performs record updates under your visual control, holds complete control over printing of reports and supports UNDO for any change!

iSecurity FileScope Insights

FileScope enable users to easily perform file editing functions as well as global and local record updates, data conversion and creation of test data.

Our Solution:

- ✓ Software development and maintenance times are greatly reduced.
- ✓ Advanced error tracing and identification capabilities.
- ✓ Print, e-mail or export a complete audit trail.
- ✓ Undo any set of changes, or particular change, performed during the last 99 days.

iSecurity
FileScope

Let's see our Product in Action!

The best way to see how it works is a demo with **iSecurity FileScope** running on a real environment.

| Advantages on our Solution

iSecurity FileScope Unlike SQL, enables modifying database requests on the fly, holds complete control over printing of reports and supports UNDO for any change!

Easy-to-manipulate

FileScope has a simple, easy-to-manipulate user interface and does away with the need to program even a single line of code!

How iSecurity FileScope Enhances Programmer Productivity?

- ✓ Triggers alert messages and corrective actions.
- ✓ High speed report generator, with no prior preparation.
- ✓ Subset Feature, enables field names when defining subsets.
- ✓ Query Wizard, quickly creates queries without programming.

iSecurity FileScope Advantages

- ✓ FileScope includes Unicode support which enables viewing **SAP, JDE, MOVEX, BPCS**, and others.
- ✓ Improved **SOX/PCI** support.
- ✓ **SYSLOG/SNMP Messages for SIEM** – up to 1000 lines per second.
- ✓ User Activity List Email – including users, times and actions.
- ✓ XML support.
- ✓ Report Generator.
- ✓ Full Screen Update.
