iSecurity  
Orchestrator

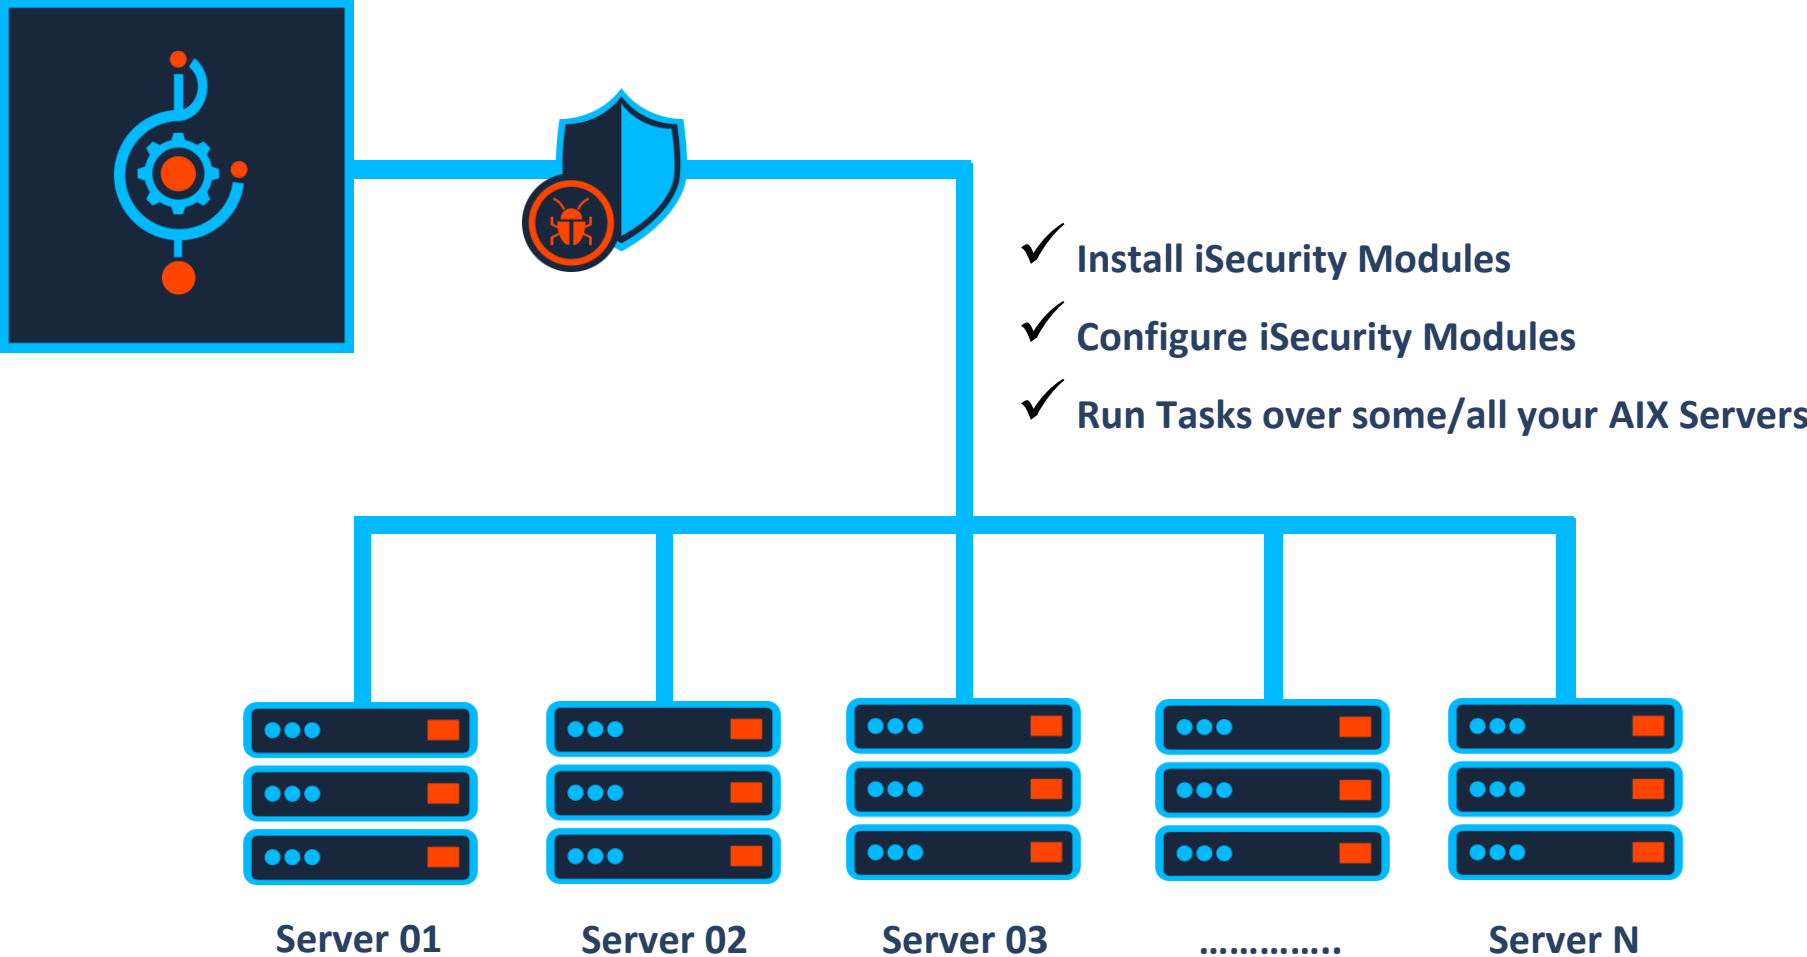

# | Orchestration For AIX Security

The New iSecurity Orchestrator makes automation and orchestration tasks easier for your iSecurity Products on the AIX Servers.

**RAZ-LEE**

# How the Orchestrator Works

# Simplify Server Security Management

iSecurity Orchestrator helps you to:

- ✓ Install / Uninstall iSecurity Modules.
- ✓ Activate / Deactivate iSecurity Modules.
- ✓ Update AV Signature.
- ✓ Start/End On Access Scan.
- ✓ Scan Directories.
- ✓ Send Files to Admin.
- ✓ Configure Directories for DB, Logs, Etc.
- ✓ View Logs.

iSecurity  
Orchestrator

# Let's see our Product in Action!

The best way to see how it works is a demo with **iSecurity Orchestrator** running on a real environment of multiple AIX Servers.

# iSecurity Orchestrator

## | iSecurity AV Now is Available for AIX

iSecurity Orchestrator is actually linked with AV and you can use it as the web interface for a single Server when you purchase iSecurity Antivirus for AIX.

# iSecurity Orchestrator for AV Advantages

The New **iSecurity Orchestrator** makes automation and orchestration tasks easier for your iSecurity Products on the AIX Servers.

As a first step, it manages several AIX servers at once, and entirely the AV module for AIX.

You can manage all the operations from a simple Web Interface.

- ✓ Install AV on New Partitions.
- ✓ Scan On-Access, On-Demand and Only-New.
- ✓ Update database from ClamAV and Raz-Lee.
- ✓ Database updater with support for digital signatures.
- ✓ History Log for review and analysis.
- ✓ All in one place.
